

ME TO YOU
SAMEN STERK

Yves Beguin is professor of Hematology and Director of the Hematology unit of the GIGA research center at the University of Liège. He is also head of Hematology at the University Hospital of Liège, Director of the Hematopoietic Stem Cell Transplant Program and of the Laboratory of Cell and Gene Therapy. He has served as treasurer of Netcord, President of the National Marrow Donor Program-Belgium and President of the Belgian Haematological Society.

My motivation for joining the advisory committee of the ME TO YOU foundation stems from my combined interest in clinical and translational research and from my participation in numerous activities of the Télévie fund-raising operation to boost cancer research in Belgium to the benefit of patients.
